

# **Algal Trends in the Upper Provo River Watershed**

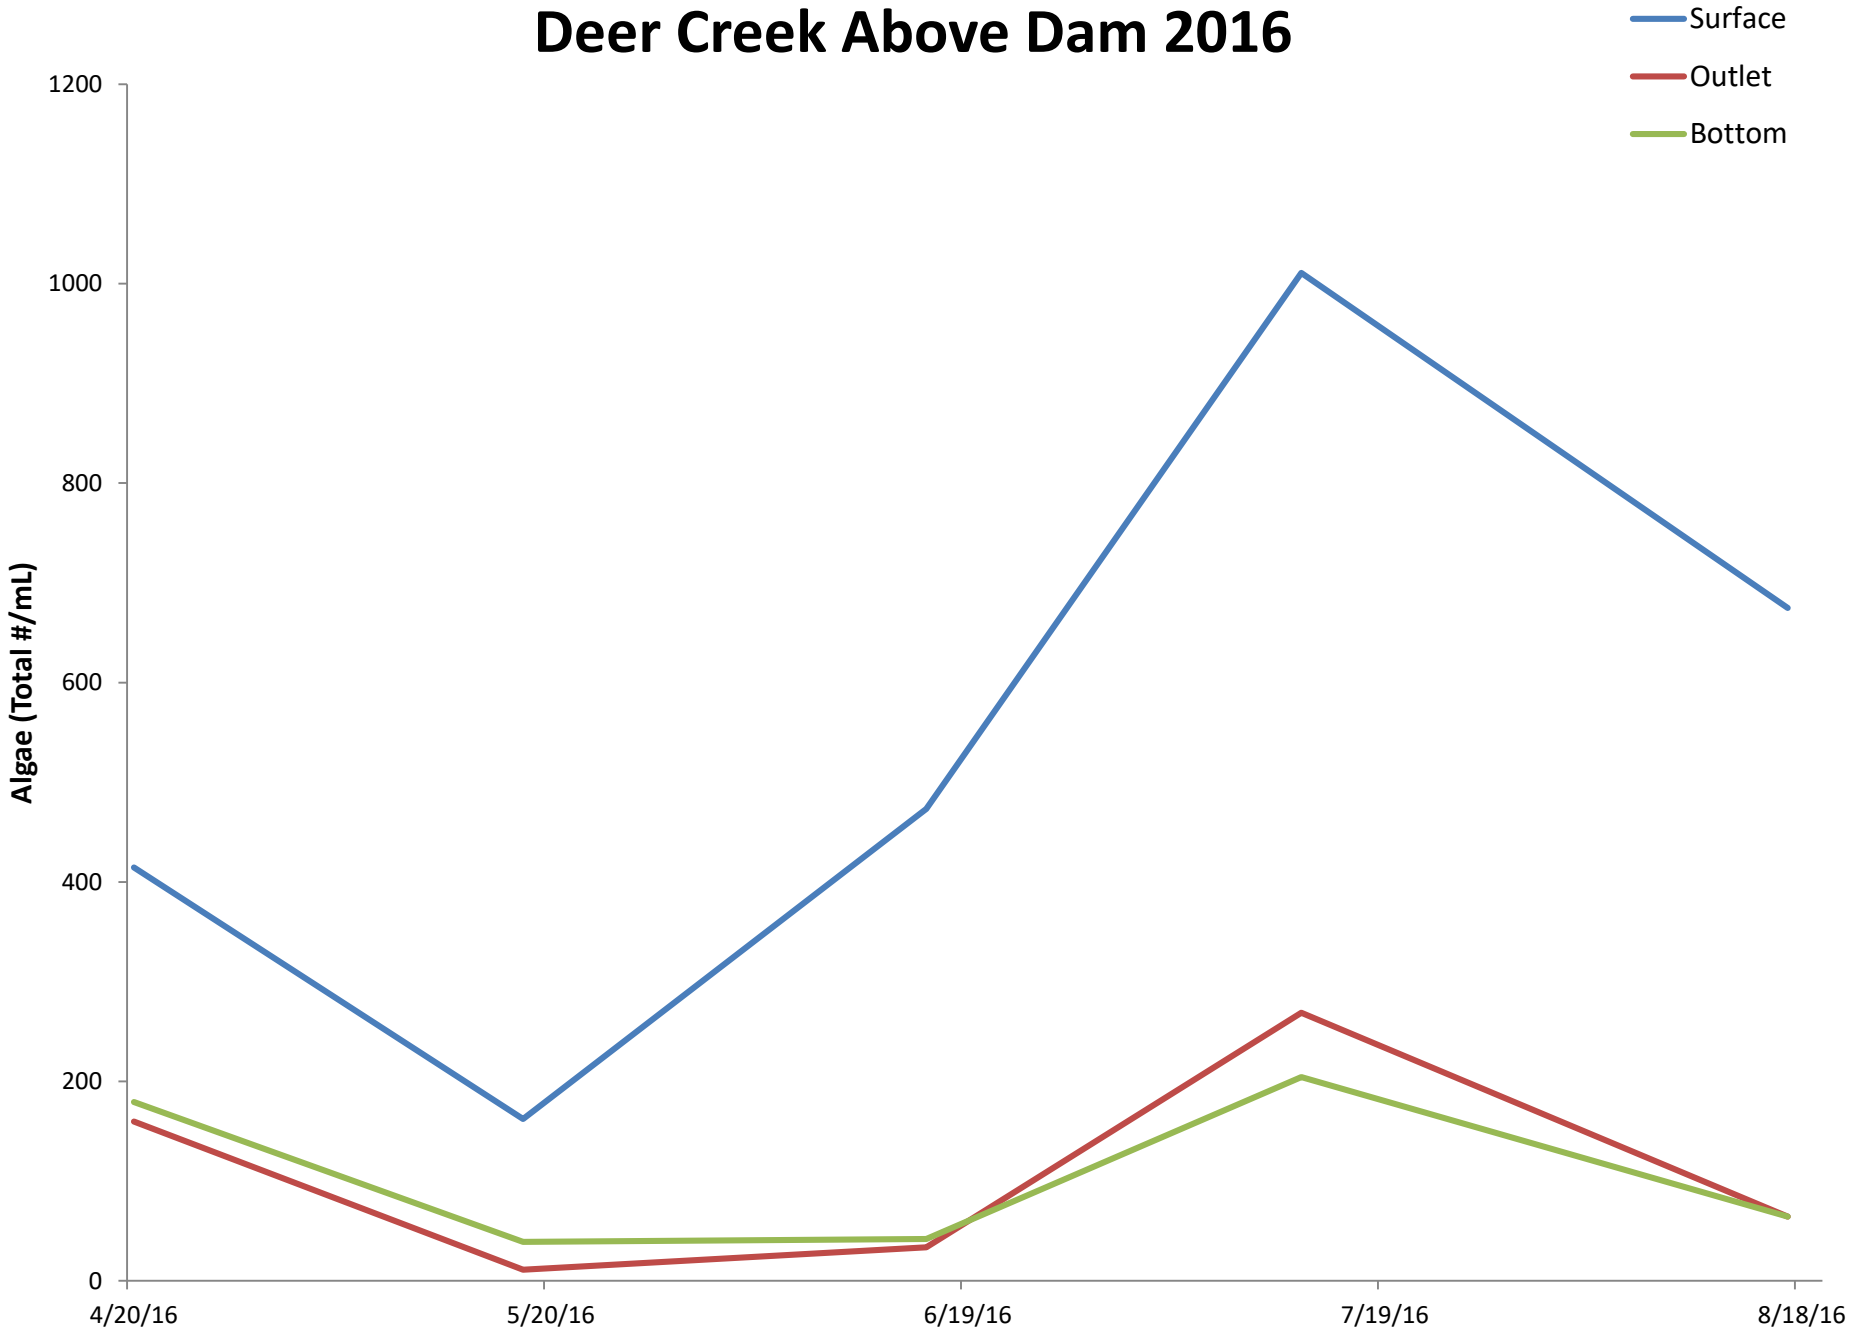

# World Health Organization (WHO) Cyanobacteria Guidelines

- Low A **low** probability for adverse health effects is expected when cyanobacteria cell counts are between **20,000 and 100,000 cells/mL**.
- Moderate A **moderate** probability for adverse health effects is expected when cyanobacteria cell counts are between **100,000 and 10,000,000 cells/mL**.
- High A **high** probability for adverse health effects is expected when cyanobacteria cell counts are greater than **10,000,000 cells/mL**, or there are cyanobacteria scums at bathing areas.
