RE: Victory Ranch Plat "W"

Dear Doug,

I have had a chance to complete a review of the revised engineering drawings for the Victory Ranch Plat "W" dated July 27, 2017. The following are from my original comments from June and have not been addressed:

1. Any disturbed area that is not vegetated or reclaimed prior to winter should be stabilized using a fast growing, temporary seed mix. Please provide a note and seed mix on the Erosion Control Plan to address this.
2. Periodic Inspections need to be made of all erosion control measures. These should occur at least weekly. If there is a rain event, then inspections should occur within 24 hours of the first 0.5 inches and at the end of the rain event. Inspection reports should be kept onsite for County Engineer review.

If you have any questions, please feel free to contact me at 801-580-9692.

Sincerely,

Alane E. Boyd, P.E.  
Principal
